

アロハ・ABC・スタジオ

## Aloha ABC Studio

Ah, the best things about Australia is the (                    ), the (                    ), and the cities (     )(     ). They're all very varied. You've got (                    ) (                    ) rainforest, (                    ) (                    ) the great barrier reef, through to amazing tall forest in Tasmania, through to (     )(                    )(                    ) deserts, which cover most of the country.

Oh, and I (                    )(                    ) some of the best beaches (     )(                    ) (                    ). There's (     )(                    )(                    ) in the landscape, and the cities are really fun, very vibrant places to work and live and have a (                    ) (                    )(                    ).

Yeah, I love Australia, but there's some bad things (     )(                    ). (                    ) the isolation, you're really a (     )(                    )(                    )(                    ). We're maybe 20 hours away from America, maybe 15 hours away from Europe, and also a (     )(                    )(                    ) China or Japan. It's very, very isolated and one last bad thing about Australia is some of the people (                    ) (     )(     ) a bit, ah I can't say that.
